SUBTRACTION

You may have learned to borrow and then pay back when you were at school. You will hear your child talking about renaming. Using renaming to subtract big numbers helps your child to understand what he/she is doing and why, as opposed to simply following a rule of thumb. This is because your child has been taught to think about numbers such as 52 as 50 and 2 and not as 5 and 2.

SUBTRACTION: The method for helping your child with subtraction is as follows:

$$\begin{array}{r}
 T \ u \\
 5 \ 2 \\
 - 1 \ 9 \\
 \hline
 \end{array}$$
